

AI for Engineering, Product & Data Teams

Engineering-depth training for the teams building AI into the product, from someone who has shipped AI systems end to end.

WHO IT'S FOR

Engineering, product, platform and data/analytics teams.

FORMAT

In-house workshop

LENGTH

Half-day or full-day

What your team walks away with

Build with AI deliberately and reason clearly about how it fails — where it earns its place in the product, and where it adds risk in production.

Curriculum

- 01 Where AI genuinely improves a product — and where it's the wrong tool
- 02 How AI features fail: hallucination, thin evaluation, silent drift
- 03 Evaluating an AI feature before and after it ships
- 04 Data, privacy and security when you build on AI
- 05 Reasoning about confident-but-wrong output in your own systems
- 06 A build-and-review checklist for AI features

You keep

An AI build-and-review checklist for shipping AI features safely.

Arthiq — live, in-person AI training for high-stakes teams.
