
AI for the Public Sector

A governance-first program for public bodies, treating fairness, transparency and accountability as the starting point.

WHO IT'S FOR

Government and public-sector teams — digital leads, programme owners, risk and assurance.

FORMAT

In-house workshop or briefing

LENGTH

Half-day

What your team walks away with

Adopt AI responsibly in the public interest — from the questions to ask at procurement to the accountability the public expects.

Curriculum

01 Where AI helps public services — and where the risks are highest

02 Fairness and transparency when AI affects citizens

03 Procurement: the questions to ask before buying AI

04 Accountability and public scrutiny of AI decisions

05 Data, privacy and public-record obligations

06 An AI adoption and procurement checklist

You keep

A public-sector AI adoption and procurement checklist.
